PROJECTS

PORTFOLIO | Tailwind CSS | July 2023 | [link](#)

- Designed and built a **PORTFOLIO** with HTML, CSS, JavaScript, and TailWind CSS to show the work that I learned in the past years.
- Samples of work available in my GitHub.
- My portfolio represents a comprehensive collection of my professional work.

Weather App | React, A.P.I. | November 2023 | [link](#)

- Created weather application built using React.js and Tailwind CSS.
- It allows users to search for weather information based on location and provides real-time weather data.
- Used *Open Weather* A.P.I. to display current weather conditions, including temperature, humidity, wind speed, and weather description.

Spotify Clone | HTML, CSS, JAVASCRIPT | December 2023 | [link](#)

- Developed a functional clone of the Spotify website.
- It utilizes the *data* and provides users with a seamless Songs browsing experience.

X.com (Twitter) Clone | Tailwind CSS | December 2023 | [link](#)

- Developed a functional clone of the X.com (Twitter) website.
- It provides users with a seamless browsing experience.
